RESEARCH INTERESTS

My interdisciplinary research interests include but are not limited to African digital humanities, the spectacle of violence online, queer identity, rhetoric of social movement, social media, postcolonial studies, power dynamics and politics. My work is centered around the trifecta of techno-capitalist neoliberalism – culture, political economy, and technology.

RESEARCH EXPERIENCE

Independent Study	In the Spring of 2022, I visited Houghton Library at Harvard to research the relationships between Irish writers and early Nigerian writers. The research was intended to look for the historical and political homogeneity between Ireland and Nigeria, especially the postcolonial experiences nuanced by literature, British colonialism, acculturation, capitalism, individualism, and techno-globalization.
